

Introduction To Web Development

Developer Student Clubs

Indian Institute of Information Technology, Lucknow

Some Goodies await you..

Different Platforms

Web Desktop

- Desktop or Laptop
- Run in a Web Browser.
Chrome, firefox, safari, Microsoft Edge

Web Mobile

- Smartphones and tablets

- Run in a Web Browser.
Chrome, firefox, safari, opera.

Some Concepts to know

Frontend & Backend

Client-Side

Server-Side

Frontend

- What is frontend Web development?

Frontend

- What is frontend Web development?

Front-end web development is the practice of converting data to a graphical interface.

Responsive

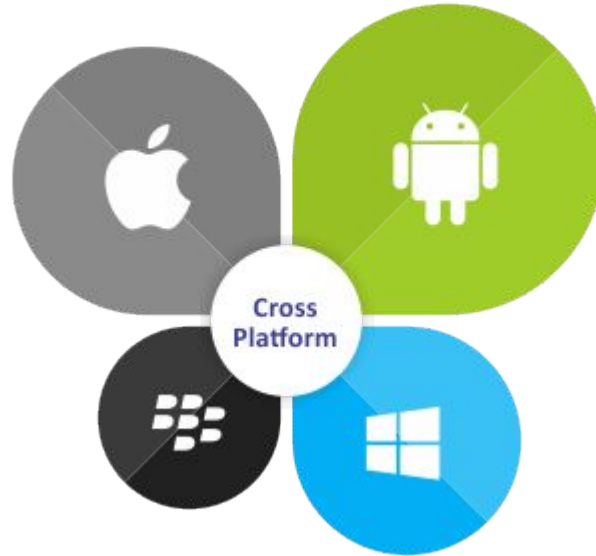

Responsive

Cross Platform Mobile

A large rectangular graphic divided into four diagonal sections of color: red (top-left), blue (top-right), yellow (bottom-right), and green (bottom-left). The word "HTML" is centered in white, bold, sans-serif font.

HTML

HTML

- Hyper Text Markup Language

HTML

- Hyper Text Markup Language

What we write:

`<h1> Hello DSC </h1>` ← an html element

What we see on web:

HTML

- Hyper Text Markup Language
- Standard Markup Language
- Describes the structure of a Web page

HTML

Basic Code

```
<html>
  <head>
    <title>Page Title</title>
  </head>
  <body>

    <h1>My First Heading</h1>
    <p>My first paragraph.</p>

  </body>
</html>
```

My First Heading

My first paragraph.

HTML

Basic Code

```
<!DOCTYPE html>
<html>
  <head>
    <title>Page Title</title>
  </head>
  <body>

    <h1>My First Heading</h1>
    <p>My first paragraph.</p>

  </body>
</html>
```

My First Heading

My first paragraph.

HTML

Basic Code

```
<!DOCTYPE html> ← defines HTML5 document
<html>
  <head>
    <title>Page Title</title>
  </head>
  <body>

    <h1>My First Heading</h1>
    <p>My first paragraph.</p>

  </body>
</html>
```

My First Heading

My first paragraph.

HTML5

Why HTML5?

- Built-in Audio/Video
- Better Interactions
- Cross Browser Support
- Mobile Optimization

HTML5

Html5 is often a generic term of the package
HTML5/CSS3/JavaScript

- HTML5 - Structure
- CSS3 - Style
- Javascript - Behavior

CSS3

- Without CSS

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width,
initial-scale=1.0">
  <title>Document</title>
</head>
<style>

</style>
<body>
  <div>
    Hello DSC
  </div>
  <div>
    Hello Moin
  </div>
</body>
</html>
```

Hello DSC
Hello Moin

CSS3

- With CSS

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width,
initial-scale=1.0">
  <title>Document</title>
</head>
<style>
  .tagname{
    color: green
  }
</style>
<body>
  <div style="color:red">
    Hello DSC
  </div>
  <div class="tagname">
    Hello Moin
  </div>
</body>
</html>
```

Hello DSC
Hello Moin

CSS3

- With CSS

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width,
initial-scale=1.0">
  <title>Document</title>
</head>
<style>
  .tagname{
    color: green ← Internal CSS
  }
</style>
<body>
  <div style="color:red"> ← Inline CSS
    Hello DSC
  </div>
  <div class="tagname">
    Hello Moin
  </div>
</body>
</html>
```

Hello DSC
Hello Moin

JavaScript

What is JS?

What is JS?

JavaScript is the programming language for the web.

- It is one of the most popular programming language in the world
- It is used to make web pages interactive.
- Help in building the animations.
- Rendering the content
- Styling our web pages and many more.

Evolution of JS

- JavaScript is a language based on ECMAScript - This programming language is evolving
- ECMAScript 5 - Today all the majors browsers have total support for ECMAScript 5
- ECMAScript 6 - Goal is to improve speed and performance in coding larger and more complex web applications, through the implementation of a redefined language syntax featuring module and class support extensions. All the major browsers are still not fully supporting ECMAScript 6 but are evolving in this way
- We usually code in ES6
- The future versions of ECMAScript are already scheduled.

JS Frameworks

Frameworks

There are many JS Frameworks, five of them stand out:

ReactJs , AngularJs , VueJs , BackboneJs and Ember

ReactJs and AngularJs are arguably the most popular frontend frameworks.

ReactJs	→	Facebook
AngularJs	→	Google

JavaScript Libraries

JS Libraries

- There are many JavaScript libraries to simplify the use of JavaScript like., jQuery , Prototype ,etc.,
- Function of jquery is to simplify the bulkier code which a developer has to write while dealing with the Vanilla Javascript.

JS Libraries

- BootStrap
There are many libraries for UI Components and styling like Bootstrap, etc.
- Makes front-end web development faster and easier.
- <https://getbootstrap.com/>

Why JS?

Few Companies Using JS

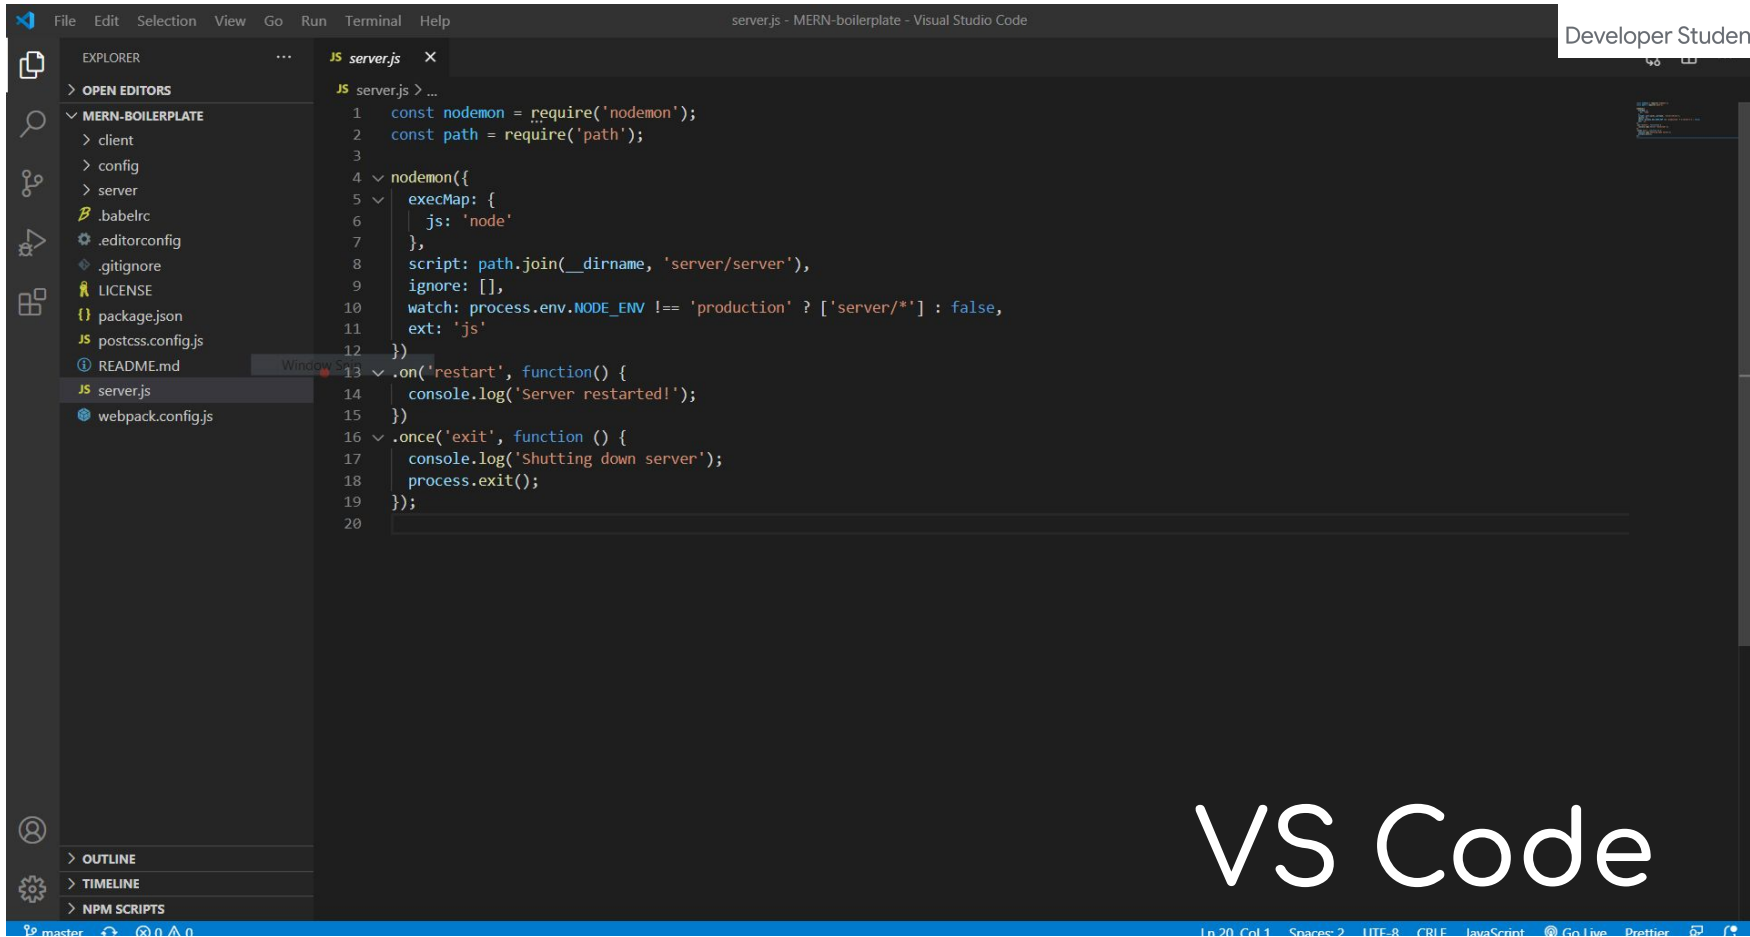

Development

IDEs

- Integrated Development Environments

VS Code

Some Best Practices

- File Naming System
 - lowercase
 - Dashes or underscores between words
- Variable Names
 - camelCase
 - Self explanatory
- Class Names
 - PascalCase
- Avoiding repeated use of `console.log()`
- Folder Structure
